

UNSTOPPABLE. IT AIN'T CALLED A RHINO FOR NOTHING.

The Rhino 660 Automatic 4x4 is the only side-by-side with the power and terrainability to tackle truly serious off-road terrain. Aside from the all-new Rhino 450 Automatic 4x4, that is. Both boast hard driving liquid-cooled engines and fully independent front and rear suspensions that tame even the gnarliest of terrain. They also come equipped with a dash-mounted, push-button On Command® 2WD/4WD system with differential lock – the exact feature you'll find on our top-of-the-line utility ATVs. The only obstacle now is deciding who to take.
