

# THE BEST

## of both worlds.

**THE LEADING EDGE IN  
VACUUM SEED METERING!**

**EDGEVAC™**  
SEED METERING

Excellent seed spacing and population control. And, consistent seed drop **FROM THE EDGE!** Especially on hillsides ... without the tumbling action or ricochet effect inside the seed tube. **FEWER PARTS** than competitive models means less to service and maintain. **EASY IN-FIELD ADJUSTMENTS** ... NO vacuum seals! Unique "floating seed disc" design means less wear and less friction, because it self-adjusts to accommodate changes in sealing surfaces between the vacuum cover and disc

**AVAILABLE SEED DISCS:** corn, soybean, milo/grain sorghum, acid-delinted cotton, and dry edible beans.

**OR, THE MOST ACCURATE AND  
RELIABLE MECHANICAL METERING  
SYSTEM IN THE FIELD TODAY!**

**KINZE® FINGER PICKUP SEED METERS** for corn. Simple. Precise. Consistent. Pre-tested on all seed sizes and shapes. Proven on millions of acres.

**KINZE® BRUSH-TYPE SEED METERING** for soybeans, milo/ grain sorghum and cotton. Extremely low maintenance system. Unparalleled population control ... without all the in-field adjustments to compensate for different seed size variations.

**KINZE FINGER PICKUP and BRUSH-TYPE SEED METERS** are available on all 2006 KINZE Planters.

**KINZE®**
