

SCIENCE IN THE FIELD

The proof is in the field.

When every field is unique and every acre has its own individual profile, a wide range of choices is required to ensure maximum performance from all your fields. You have to be able to put the right product on the right acre. So Pioneer is not — and never will be — a “one size fits all” company. We offer more than 300 corn hybrids, all developed from one of the world’s largest and most diverse sources of corn genetics. We combine superior genetics with traits to deliver robust emergence, root and stalk strength, insect and disease resistance, grain quality, and drought and stress tolerance. Your Pioneer sales professional knows you, knows your fields and knows just which package of hybrids will deliver the performance you’re looking for.
