

IT'S ALL IN THE GENETICS – WHEN USING THE RIGHT TOOL

Choose your seed based on genetics, not seed size. Because when it comes to seed, the Case IH Advanced Seed Meter doesn't play favorites. Plus, Case IH Early Riser® planters help ensure accurate seed populations, precise in-row placement and consistent depth control. And they do it all while operating at high field speeds. So you'll be ready to make the most of your seed and your planting window. To learn more, see your Case IH dealer or visit caseih.com.

BE READY.
