

AFTER 80 YEARS, WE'VE COME FULL CIRCLE.

Eighty years ago on his farm near Columbiana, Ohio, Harvey Firestone introduced the first pneumatic tractor tire – a tire that helped launch the most rapid and striking changes in farm equipment history.

On that same farm today you'll find the Firestone Farm Tire Test Center – the only research facility in the world dedicated exclusively to agricultural tires. It's why, after 80 years, Firestone tires kick dirt.

Visit your Certified Firestone Farm Tire Dealer and see for yourself.
