

Huskie®

“Smart
business
decision.”

“Hit ‘em where
it hurts.”

Take out 50 tough weeds and get full rotational flexibility.

When you listen to that good inner voice it tells you that Huskie® herbicide is a smart choice. Because Huskie takes out 50 tough weeds in your wheat and barley, including those resistant to other products. Plus you get full rotational flexibility. And when you listen to that other little voice that says it's time to get even for all those seasons of lost yield, well, that's just revenge. But no matter who you listen to, Huskie gets the job done.
