

WE COULD TELL YOU HOW WELL
OUR ADJUVANTS WORK. BUT WE'LL
LET THE 67 MILLION ACRES THEY'VE
COVERED DO THE TALKING.

WINFIELD[®]
BE GREATER[®]

When you're covering millions of acres, efficiency matters. That's why farmers across the country sprayed 67 million acres with InterLock[®] adjuvant technology in 2014. With reduced drift, better plant coverage and increased performance, InterLock[®] technology can help optimize every acre you own. Just like it has for 67 million others. Learn how adjuvants can help you get more out of your spray systems at winfield.com/interlock
