

## Go dustless with remote control

**S**HUR-CO. wants to keep you out of the dust when you unload a hopper of grain or other bulk material, so they've introduced the ProTrap Electric Hopper Door Opener.

The ProTrap features a high-torque electric motor with planetary gears for power and a five-year warranty for long

life. An electric brake automatically locks the hopper when the unit is not in use, and the universal mounting brackets fit most trailers.

The flip-style Smart remote transmitter deactivates the system when the cover is closed, or after six minutes of inactivity. The 5-channel modular system

can control your automatic tarp, front hopper, rear hopper, lights or other 12 VDC accessories available from Shur-Co.

■ **For more information on the ProTrap, call 800-474-8756, or visit [www.shurco.com](http://www.shurco.com) and click on the ProTrap logo.**

**M135X**— Intelli-Shift™ transmission, added power and torque with an electronic common rail fuel system for less noise and enhanced fuel efficiency.

**M40 Series**— Turbocharged, dual-speed (M9540HDC24-I) 4-WD power and traction for heavy-duty productivity.

**M108S**— Powerful, clean-running diesel engine reduces emissions and fuel consumption. Available with Swing Shift or Swing Shift Plus dual-speed transmission.

## Delivering the mash

**W**ITH the boost in ethanol production across the country, distillers grains have become a staple in the feedlot and dairy industry. The sticky, dense grains, however, are tough on equipment and have been the cause of breakdowns and delays.

MMI's new delivery box is designed specifically for handling distillers grains with high-torque hydraulic motors and a high-end hydraulic system with sensors and computer feedback loops. The machine provides consistent feedout regardless of engine rpm, and keeps track of its own working pressures to regulate the floor chain to adjust for loads.

■ **MMI is taking orders for the new delivery boxes. You can get more information at 800-523-2614, or visit [www.mixerfeeders.com](http://www.mixerfeeders.com).**

## AutoFarm unveils new Envizio Pro

**E**MBEDDED steering control is the highlight of AutoFarm's new Envizio Pro, which allows it to work with the AutoFarm OnTrac2 GPS Assisted Steering System on a wide range of equipment, including tractors, sprayers, spreaders and combines.

The addition to the OnTrac2 GPS offering gives growers assisted steering plus application control, boom management and planter control in a single easy-to-use and affordable system.

The OnTrac2 system was introduced in February for hands-free steering that eliminates skips and overlaps, lowers fuel consumption, expands the seasonal operating window, and dramatically reduces operator fatigue.

Its unique design does not require the removal of the steering wheel and simply latches on and off for easy transfer from one piece of equipment to another.

■ **For more information on Envizio Pro and OnTrac2 equipment, visit [www.gpsfarm.com](http://www.gpsfarm.com) or call 800-947-7327.**

## Kubota M Series

Kubota's full line of mid-size tractors is made to help you work smarter, not harder. The deluxe M Series delivers premium performance second to none in the 85 to 118 PTO HP range. And the new M100X, M110X, M126X, and M135X out-manuever the competition with exclusive Bi-Speed Turn, 16 x 16 Intelli-Shift™ with 8-speed powershift, increased power, enhanced fuel efficiency, and improved production capacity. Nothing else moves you like Kubota.

**Kubota**  
EVERYTHING YOU VALUE

Financing available to qualified customers through Kubota Credit Corporation, U.S.A. For product and dealer information, call 1-888-4-KUBOTA, ext. 353 or go to [www.kubota.com](http://www.kubota.com). Optional equipment may be shown.
