

The Pioneer lineup offers over 250 unique corn hybrids, including more than 40 new versions of The Better Bt® — hybrids combining proven, proprietary Pioneer genetics with Herculex® in-plant insect protection. That means more choices to fit the potential of every field. Individual field potential can be closely analyzed by a range of our useful services, including the Pioneer FIT® Mapping System and the GrowingPoint® website Record Keeping system. Your Pioneer sales professional can deliver these outstanding products and services field by field.
