

HIGH VALUE...

# WITHOUT A HIGH PRICE

When you get right down to it, convenience and affordability are the driving force behind a large number of equipment purchases. AGCO Hesston's 5100 Series Round Balers have them both. Available in two sizes, they're specifically designed for the operator who needs a small, easy-to-handle bale package at an affordable price. Yet, the 5100 Series doesn't come up short on standard features.

- Fewer drives translate into improved reliability and less maintenance.
- Tractor requirements are as low as 30 PTO horsepower on the Model 5134.
- An open-throat, vertical bale chamber provides quick bale starts and excellent capacity.
- An auto-tie option is available as an option on the Model 5145 for faster bale wrapping.

Stop by your AGCO Hesston dealer today and discover how "high value" doesn't have to mean "high price."
