

Full-on
protection
up and down
the field.

 **PONCHO**[®]
250 **1250**

Poncho[®] 250 seed-applied insecticide systemically protects seed and seedlings from a broad spectrum of early season pests, such as white grubs, black cutworms, wireworms, flea beetles and seed corn maggots. For even more powerful protection that includes rootworm larvae and bill bugs, use seed treated with Poncho 1250. Protecting your investment is the name of the game, and nothing works harder to increase vigor, stands and yield than Poncho. Ask your seed corn supplier for the hybrids you want, with the seed-applied insecticides you need – Poncho 250 or Poncho 1250.
