The world is full of practice fields. Your cornfield shouldn’t be one of them.

Each year, corn growers have just one chance to get it right from the start. Avicta® Complete Corn nematicide/insecticide/fungicide combination of separately registered products is the only seed treatment with the proven, consistent ability to triple-protect from day one and improve yields. Talk to your seed supplier, or go to AvictaComplete.com/Corn to learn more.
