

This Season, **Yellow** is the New **Green** in tractors.

Not Your Everyday-Run-of-the-Mill-Tractor...

The All New Challenger 600C Series features innovative engineering, fuel efficiency and cleaner running emissions, making it the most advanced row-crop tractor in the world. The new C Series offers four models with maximum gross engine horsepower from 270 hp to 350 hp, and heavy-duty capabilities that include a range of features and benefits that are completely unprecedented.

Powered by the AGCO SISU POWER™ 8.4 L engines, the MT600C Series tractors address EPA emissions standards by introducing E3 Selective Catalytic Reduction (SCR) technology which significantly reduce the emissions of nitrous oxide and particulates.

The Challenger 600C Series tractors set the standard in terms of productivity and the cleanest emissions in the industry, while meeting professional farmers' demands for more power and higher efficiency. Take a closer look at the Challenger 600C Series at an NMC location near you.
