

It takes breadth of knowledge and depth of experience to pinpoint answers for individual growers. Whether a situation involves challenging weather conditions, soil variability or rotational practices, a Pioneer sales professional can recommend the right package to maximize the potential of each field.

Pioneer sales professionals are backed by hundreds of scientists and hands-on agronomy experts. Together they field-test the latest genetics for your area and keep you ahead of disease and pest problems. Our goal is to put the newest, best products and tools in the hands of the right people in the right places.
