PERFORMANCE

DING ANCE

True performance is measured time after time, field after field, season after season. If you're looking for a consistent winner, check out the NCGA Yield Contest results. In category after category, field after field, you'll see more winners who planted Pioneer® brand hybrids than any other brand. You can see similar, consistent success in thousands of on-farm trials where conditions vary dramatically across geographies. Pioneer sales professionals have the knowledge and technical support to recommend high-performance hybrids that will deliver top results from each of your fields.
