Agri-Mark Family Dairy Farms

Agri-Mark is owned and controlled by dairy farm families from New England and New York. Our farmers work together in the marketplace so they can receive the highest possible price for all of the milk their farm produces.

We welcome other dairy farm families to contact us and work together with us for a better future for Northeast dairy farm families. We are building long-term, value-added markets here in the Northeast that add real value to our region's farm businesses. We also continue to be the voice for the Northeast dairy farm family on legislative issues as we work year-round for higher on-farm milk prices.

For more information, call our Membership Department toll-free at 1-800-225-0532 or contact us at www.agri-mark.net.
