

5 BUSHELS MORE PER ACRE.

How many acres did you say you have?

The benefits of combining three fungicides and an insecticide in one seed treatment really add up. Up to five extra bushels per acre,* to be exact. And you get it with Cruiser Extreme® Pak. With four active ingredients working together, it protects your crop from a broad spectrum of insects and all four major fungal groups.

Ask your seed company to treat your seed with Cruiser Extreme Pak today.

*One hundred twenty university, third-party and Syngenta plots between 2001 and 2003 showed an average yield increase of 5 bushels per acre, compared to the standard seed treatment. The actual yield increase in any given situation depends on many factors, and Syngenta makes no representations, warranties or guarantees regarding the actual yield increase on your acres. Cruiser Extreme® Pak is a seed company-applied promotional combination of four active ingredients that deliver .25 mg ai/seed of Cruiser (thiamethoxam) plus three fungicides: Apron XL®, Maxim® XL and Dynasty®. ©2005 Syngenta Crop Protection, Inc., P.O. Box 18300, Greensboro, NC 27419. Important: Always read and follow label instructions before buying or using these products.
