## One time is enough. One pass is enough.

If you only want to spray once, LUMAX® is the one you want. It's the premier, one-pass herbicide for grasses and broadleaf weeds. A single preemergence application keeps fields clean all season. So you get higher yield potential whether you grow conventional, Roundup Ready® or Agrisure™ GT corn. LUMAX even controls weeds resistant to glyphosate—making it a true Resistance Fighter™ brand. Ask your dealer how LUMAX can make weeds and resistance non-factors in your field.
