

One time is enough.

One pass is enough.

If you only want to spray once, LUMAX® is the one you want. It's the premier one-pass herbicide for grass and broadleaf weeds. A single preemergence application keeps fields clean all season. So whether you grow conventional or glyphosate-tolerant corn, you get higher yields. And because it uses Callisto Plant Technology,™ crop safety is as sure as its performance.

LUMAX is a Resistance Fighter™ brand. resistancefighter.com
