

If we can't convince
the bean grower in you,
we're sure the bean counter
will be interested.

New Cruiser[®]Maxx[®] Pak seed treatment has something for everyone. A powerful combo of two separately registered products, Cruiser[®] insecticide and ApronMAXX[®] fungicide, there's no better protection against bean leaf beetles and aphids. Plus, CruiserMaxx Pak is just as tough on early season diseases like *Pythium*, *Phytophthora* and *Rhizoctonia*. You'll get the most out of your seed investment with improved plant stands, more vigorous growth and an earlier canopy. Come harvest, your decision to use CruiserMaxx Pak can pay off with higher yields. Who doesn't like that? Contact your local Syngenta rep or visit www.cruisersoybeans.com
