

**650** LB-FT. OF TORQUE\*

Allison six-speed automatic transmission on the Silverado HD offers a GM® segment-exclusive\*\* Tap-Up/Tap-Down feature. Once the feature is selected, a simple push of a toggle switch will let you manually shift between gears to maintain a controllable speed and keep your load moving. Also new on the 2006 HD is the

Allison cruise-control grade-braking system. When descending steep grades, the transmission will automatically downshift to help maintain speed. Not to mention, it can help reduce brake wear. So who do you love?
