

“WHY DO I USE FS?”

“I need information. FS gives it to me.

We’ve been grid mapping since they first came out with it.

Sampling specific sites—checking soil fertility—only applying what we need where we need it.

FS has really been on the leading edge of doing that here. And it wound up saving us a lot of money.

Why do I use FS?

FS gives me the knowledge and information I need to make me a better, more profitable farmer.

Local knowledge. Proven results.”
