

Your Pioneer sales professional brings you the benefits of the latest agronomic expertise and proprietary genetics plus a local understanding of the ground you farm. We're here to help you select the right product for the right acre to maximize your return.

Yield-defining Y Series soybeans are just one example. Developed using our exclusive Accelerated Yield Technology (AYT™) system, they're one more reason Pioneer® brand varieties are the single most planted brand of soybeans. And with the help of proprietary GPS tools such as the Pioneer FIT® Field Planner system, your sales professional can help you choose hybrids or varieties with the advanced traits that will make a performance difference in each of your fields.

Add in customized packaging, delivery, seed treatment and information offerings and it's easy to see — you get a whole lot more from Pioneer than just a truckload of seed.
