

TECHNOLOGY THAT **FUELS**[™]

You are the new source of renewable, domestically produced fuel for the engines of America's economy. So Pioneer is working with the ethanol industry to offer hybrids that produce maximum ethanol per acre. How? By teaming unique Pioneer genetics that have higher ethanol yield potential with Herculex[®] insect protection traits that can help reduce grain damage from molds and reduce mycotoxins.

Ethanol production is set to double in the next few years, so the demand is there. And Pioneer is here for you, with ... *Technology That Fuels*[™].
