

It's a fact. When it comes to in-plant insect control, there's only one *better Bt*: Pioneer® brand hybrids with Herculex® insect protection traits. Herculex I controls not only **CORN BORERS**; it's the only in-plant trait that also helps stop **WESTERN BEAN CUTWORMS** and **BLACK CUTWORMS**.

Our newest offering, Herculex XTRA, stacks all the benefits of Herculex I with the Herculex RW trait, to provide outstanding control of **ROOTWORMS**. All hybrids containing Herculex traits also contain the LibertyLink® gene, and most are also available with the Roundup Ready® Corn 2 gene. Our hybrids can be stacked the way you want them and all contain proprietary Pioneer genetics. Pioneer, there's just no doubt about it.

Technology That Yields®
