

# Monsanto aids Ag in the Classroom

**T**HE Monsanto Fund recently donated \$50,000 to Illinois Agriculture in the Classroom. The gift will support Action Science Through Agriculture, an IAITC program that provides Illinois teachers with scientifically based resources to teach students about the role ag plays in American society.

"Monsanto people know the future belongs to those who understand and wisely use science and technology," says Deborah Patterson, president, Monsanto Fund. "Partnering with Ag in the Classroom in Illinois gives a major boost in science for our children, the next generation of knowledge workers

and informed consumers."

During the coming school year, IAITC expects to reach 30,000 teachers in Illinois — 21% of public school teachers in the state, pre-K to grade 12.

"Monsanto has been a long-term supporter of Ag in the Classroom," says Steve Newman, executive director

of the IAA Foundation. "We are most grateful that their continued funding will help us to teach children about the science of producing food, fiber and renewable fuel in modern agriculture, education that is as relevant as any they will receive."

## W6526

### Our Big Fish Really Delivers

W6526 IS MORE THAN A NUMBER!

- A 110 RM hybrid with YieldGard VT Triple® technology
- Stable, high-yield performance across environments
- Very good root and stalk strength
- Solid agronomics
- Remarkable drought tolerance
- Stellar late-season plant health
- Recommended for light to medium soils
- Highly recommended for continuous corn
- Also available: W6527 (YGCB/RR2)

More than a number.™

YieldGard VT Triple® and Roundup Ready® are trademarks of Monsanto Technology LLC.

## W7381

### Our Big Fish Really Delivers

W7381 IS MORE THAN A NUMBER!

- A 112 RM hybrid with YieldGard VT Triple® technology
- Impressive yield potential across a wide range of soil types and tillage systems
- Exceptional northern leaf blight tolerance
- Very good drought tolerance
- Recommended for continuous corn
- Also available: W7383 (YGCB), W7387 (YGCB/RR2) and W7389 (YGPL)
