

WE'RE BREEDING MORE YIELD POWER INTO EVERY BEAN

Pioneer® brand soybean varieties are helping growers accelerate their output and blow past previously unheard of yield levels. Innovative molecular breeding techniques, including our new Accelerated Yield Technology, may not mean much to you ... but are big reasons behind the offensive and defensive power of Pioneer soybeans. They're bred to yield and built to defend. That's why growers plant more soybean acres to Pioneer than any other brand. See your full-service Pioneer sales professional.
