

# 154 bu/A ENCORE

Congratulations, Kip, for breaking your own record.\*

A new world record soybean yield — his second in two years — showcases Kip Cullers' intensive management skills and expertise. Kip set his new record with Pioneer® variety 94M80 (RR) on irrigated ground. He also recorded impressive 100+ bu/A entries with Pioneer varieties 93M61 (RR) and 94B73 (RR). Pioneer soybeans are delivering accelerated yield gains—by packing high yielding genetics with resistance and tolerance to many troublesome pests. It's no wonder growers across the nation plant more soybean acres to Pioneer than any other brand.

*\*2007 yields witnessed and verified by officials of the Missouri Soybean Association Yield Contest.*

Technology That Yields®

RR= contains the Roundup Ready® gene.
