

NAILS RUST.

Maximizes yield.

STRATEGO

Stratego[®] fungicide fights Asian soybean rust, while **XLERATE** technology helps provide maximum yield.

With two modes of action, Stratego protects soybeans from a broad spectrum of yield-robbing diseases. That means more vigorous plants and more bountiful yields, just like on your corn acres. So for superior disease protection and higher yields, think strategically. Think Stratego.
