

We've got your back on the insect front

Nuprid™

The imidacloprid insecticide option that really makes a difference

Nuprid™ insecticide not only provides the quality control you've come to expect from the time-tested active ingredient, imidacloprid, it epitomizes all the ways that Nufarm is watching out for your best interests.

Nuprid™ has been thoroughly tested in field conditions and is supported by an educated sales force, responsive customer service department and our own top-notch research facility. We firmly stand behind our products so you can be totally comfortable in using them.

There are two familiar formulations for your consideration, Nuprid™ 2F for soil applications and Nuprid™ 1.6F for foliar applications. Both of them offer long-lasting control of even the most troublesome pests in a variety of crops.

Ask your distributor, dealer or retailer today about this solid alternative and outstanding value.
