

A New Frontier for Burley Tobacco Farmers

Burley Stabilization Corporation
Representing burley farmers in the domestic and
global tobacco market.

Burley Farmers are encouraged to pay close attention to
good marketing practices:

Prepare bales by stalk position.

Bales must be clean and free of foreign matter.

Dead, green or off color leaves should be removed.

Pay close attention to moisture levels.

Diligence in proper marketing preparations will help
insure demand for U.S. burley leaf in the domestic and
global markets.

“Grown in the U.S.A. It Matters!”
