

MIG welding DVD boosts know-how

If you're still using a stick welder or would like to try wire welding, Miller Electric has a DVD for you.

The new instructional video costs \$40, but it's 70 minutes worth of direction on how to start MIG welding or how to improve your ability. The techniques covered by the lessons on the DVD are relevant to many fabrication or repair applications. The video includes guidance on proper machine set up, joint preparation, wire selection, gun angles and a special section on plasma cutting.

"MIG Welding Made Easy" features Ron Covell, owner of Covell Creative Metalworking in Freedom, Calif., who travels the nation holding metalwork seminars. Covell is well-respected in the street-rod industry, and his cars and motorcycles have been featured in numerous magazines.

Square bales by Massey Ferguson

MASSEY Ferguson has introduced a new Hesston Series Model 2150 large-square baler for building 3x3 bales.

The 2150 builds slightly smaller bales than the company's 2170 and 2190 models, but offers the same high capacity and solid bale-building technology. The 2150, however, has been re-designed from the ground up — except for the field-proven single gearbox and chain drive system. The system boasts only two shear bolts total.

Upgrades include better steel, increased flywheel weight and new slip clutches with five disks instead of four. Sealed bearings replace most bushings, and tapered roller bearings replace roller ball bearings for reduced wear. The machine also has an auto-lube system instead of a hand-pump to keep the knotters lubricated — a feature that can be controlled from the tractor cab.

The 2150 picks up hay with a four-bar pickup, and a torsion bar flotation system eliminates crop catching and trash-collecting springs. Also, a newly designed hydraulic blower uses a transverse impeller fan to keep the knotter area clean and trouble-free.

The new baler comes with an on-board hydraulic system to simplify hook-up and eliminate pressure variables.

Versatile product gives humidity and temp readings at a glance

Producers using temperature and humidity readings for poultry, livestock or grain storage have a new easy-to-read tool at their disposal in the Dickson Graph-At-A-Glance Flat Panel Data Loggers.

The new panels sport a 4.5-by-3.4-inch screen for \$299 — a 37% savings over earlier models.

In addition, the loggers include flash memory card data transfer ability, USB-enabled triple-speed downloading, user-defined display settings, 32 KB storage, and audio and visual alarms.

■ For more details about the new loggers, call 800-757-3747 or visit www.dicksondata.com.

LIKE YOU, FARMING IS IN ITS DNA.

Farmall®, one of the most famous names in tractor history, is back with 20 versatile new models ranging from 31 hp to 90 PTO hp. Farmall tractors are powerful multitasking machines ideal for loader work, mowing, baling, box blading and much more. Just like you, farming is in their DNA. Learn more at caseih.com. **CASE IH. FOR THOSE WHO DEMAND MORE.™**
