

# FINISH STRONG

**Jung Seed keeps you in the lead with the latest traits and technology available.**

Jung Seed provides a complete package to help you maximize yield and manage risk, including the full complement of traits across its corn product line.

**YieldGard VT Triple**

Plant Jung Seed with YieldGard VT Triple for maximum insect protection and unsurpassed weed control. **Benefits include:**

- Effective, consistent in-plant protection
- Maximum roots and healthier stalks
- More uptake of moisture and nutrients
- Broad-spectrum weed control in the Roundup Ready System
- Convenience and application flexibility
- Outstanding crop safety

### An 8 to 10 bu. advantage

Jung Seed Genetics has worked hard for years to lead the industry with the highest quality seed. Jung's seed with 95 to 99% germination emerge virtually at the same time, typically resulting in an 8 to 10 bushel yield advantage.

### \$67.50 more per unit of seed

With corn valued at \$3/bu., planting Jung 99% germination seed can produce \$67.50 more profit per unit of seed versus the industry standard of 95% germination.

**"It's probably the most powerful feed you can grow."**

- highly nutritious
- highly digestible
- huge tonnage
- higher milk production
- improved herd health

**Jung SEED GENETICS™**
