Try on-the-go moisture meter

DICKEY-JOHN has introduced the GAC500 XT semiportable moisture tester that provides fast, consistent results in the field and on the farm. The new instrument uses the same technology that created the federal standard GAC2100 for elevators and delivers the same accuracy for less than half the price.

The GAC500 XT gives producers access to affordable,

reliable moisture, temperature and test-weight readings for applications including grains, cereals, oilseeds, grass seeds, vegetable seeds and beans.

Designed for use worldwide, it offers a variety of features that allow for easy use across the globe. The unit can store 16 grain calibrations, and more than 450 product calibrations and updates are available simply by downloading files

from the company's Web site. The GAC500 XT comes preloaded with 10 languages. In addition, it provides a choice of power sources. Choose 110/220 volt, DC converter, or cigarette-lighter power sources.

Testing is easy: Simply choose your grain; load the hopper; and press a button. No leveling or adjusting of samples is necessary. For more information, call (217) 438-2442.

DICKEY-JOHN'S NEW GAC500 XT semiportable moisture meter offers "elevator accuracy" for less than half the price.

Now GreenStar AutoTrac Ready – A \$3,948 value!

With the addition of the 9620T, John Deere now gives you four choices in high-powered track tractors ranging from 375- to 500-engine horsepower.

These days large acreage requires large equipment to farm as efficiently and profitably as possible. John Deere helps you power up and pull ahead with two 500-horsepower models – the 9620 4-wheel-drive and the 9620T Track Tractor.

Now all 9020 Series tractors come from the factory GreenStar™ AutoTrac Ready – an added value that's worth up to \$3,948!*

With rising energy costs, adding AutoTrac Assisted Steering can pay for itself fast. AutoTrac uses GPS signals to reduce implement overlap to a matter of inches and lets you boost operating speeds. You'll finish more acres per day with less fatigue, and drive down input costs like fuel, seed, fertilizer, and chemicals.

The 9620 and 9620T come equipped with electronic fuel-injection, an 18-speed Automatic PowerShift Transmission, and high-capacity hydraulics with easy-to-use fingertip controls. Plus the optional ActiveSeat™ gives you the smoothest tractor ride around (not available for track tractors).

The 9020 Series is part of our on-going commitment to build easy-to-operate tractors that deliver rock-solid dependability, unmatched uptime, and superior productivity. See your local dealer today for more information.

*Figures shown are in U.S. dollars. AutoTrac Ready applies to 2006 model year only.

THE JOHN DEERE 5025 SERIES TRACTORS

The 5025 Series Tractors combine the versatility of a utility tractor with time-saving features you'd expect to find on a bigger tractor.

Start by choosing the transmission that's right for your operation: standard SyncShuttle™, or optional 12F/12R or 24F/24R PowrReverser™.

Then there's your choice of three roomy operator stations, all with enhanced comfort, ergonomic controls, and great visibility.

And you'll put more time on your side with options including engage-on-the-go 4-wheel drive, selectable detents with the rear deluxe triple SCV, third-function loader joystick, and electrohydraulic hitch and PTO.

Visit your local John Deere dealership and test drive a 5025 Series Tractor. You'll find it's time well spent.

MODEL	5225	5325	5425	5525
ENGINE HP	56	67	81	91
PTO HP	45	55	65	75

LOADER CYCLE TIMES ARE FAST when you pair a John Deere loader with your 5025 Series Tractor. Up to 18.4 GPM hydraulic flow and a tandem-gear pump provide power when you need to implements.
