

YES

This season you don't have to choose between the two. The exclusive, superior genetics of Pioneer® brand hybrids can carry all the protection traits you're looking for while still helping deliver the superior performance you've come to expect. Your Pioneer representative can help you pick just the hybrid to fit your practices and your acres. More than 75 percent of the Pioneer brand corn planted in 2006 will be hybrids new in the past three years. The right answer is simple, just say "Yes" to Pioneer ...
