

Rimfire®

Put over 30 grass and broadleaf weeds in their place.

Rimfire® herbicide controls wild oats, even ACC-ase resistant biotypes, and other tough weeds like foxtail and cheat, while suppressing downy brome and Persian darnel. In fact, Rimfire offers activity on more than 30 grass and broadleaf weeds. All with a flexible application window and in-season residual activity. Rimfire also offers rotational flexibility to 13 other crops, including sugarbeets. For more, ask your retailer, or visit us online.
