

## Does your herbicide only do half the job?

Introducing GoldSky™ herbicide, the first product to deliver cross-spectrum control of both tough grasses and broadleaf weeds in spring wheat. Now there's one herbicide that controls grasses like yellow foxtail and wild oats (including ACCase-resistant biotypes), as well as difficult broadleaf weeds like kochia, wild buckwheat, pigweed, lambsquarters, Russian thistle and wild mustard. GoldSky gives you greater flexibility too, with no crop rotation restrictions and a wide application window. Finally, there's one herbicide that can do the whole job — GoldSky herbicide from Dow AgroSciences.
