

## Save your feet and take a tram

**T**RAMS for transporting visitors from parking to Tent City also will transport visitors to the field demonstrations and will run continuously all three days of the show.

"Special thanks to John Deere Co. for providing 12 new tractors to pull the trams," says Randy Reisterer, field demonstrations chairman.

He also notes that nearly 200 volunteers will be involved with staffing the field demos and trams during the three show days.

"Without these many volunteers, the field demonstrations would not be possible, and we are grateful for their contribution to the overall success of the show," says Reisterer.

## Test it yourself in the Ride and Drive area

**A**NOTHER popular feature of Wisconsin Farm Technology Days is the Ride and Drive area, located immediately to the north of Tent City. Large-scale agricultural producers will be able to ride in tractors and utility vehicles equipped with the latest in precision guidance systems and auto-steer. Commercial spray applicators will be able to test-drive self-propelled sprayers.

The Ride and Drive area also will include skid-steer loaders for contractors and farmers to look at, compare and test-drive. Large-property owners will find compact tractors and utility vehicles from the various manufacturers at the show and will want to try them out. Commercial lawn cutters and homeowners looking for new lawn mowers will be able to take a test-drive in the lawn cutting area.

### Buy tickets in advance and save

**W**ISCONSIN Farm Technology Days is offering advance tickets for sale, and at a discount. You can purchase a block of 10 tickets for \$40, which saves \$1 per ticket or 20% of the tickets' usual cost.

"Buying a block of tickets makes a lot of sense if a farmer is bringing a large family or group of friends, especially if they're going to attend over several days," says Anna Maenner, the show's marketing coordinator.

You can purchase tickets in advance by calling Maenner at 920-478-3852 or by e-mailing [info@wifarmtechnologydays.com](mailto:info@wifarmtechnologydays.com). Advance tickets are also available from the Brown County Agriculture & Extension Service Center, 1150 Bellevue St., Green Bay, WI, 54302. Call the show's executive secretary, Mark Hagedorn, at 920-391-4612, or e-mail [mark.hagedorn@ces.uwex.edu](mailto:mark.hagedorn@ces.uwex.edu).

## New solutions to high residue problems

Residue management is an important factor in achieving higher yield potential and productivity. Brillion offers two new solutions to residue problems.

### Landcommander III

Need a unit to work through heavy trash and not plug up? The third generation Landcommander® III will help you take command over residue and compaction with adjustable disc gang angles and hydraulic depth controls. The Landcommander III is available with 15," 20" and 30" shank spacing and working widths from 15' to 20'.

### Soil Builder II

With stronger frames, larger cutting coulters, heavier shanks and greater trash clearance, "Conservation Tillage" farmers will love how easily the Soil Builder II handles heavier residue conditions. New "Super Duty Shanks" feature a coil spring reset that holds the 4" twisted shovel in the soil through even the toughest conditions.

Whatever your tillage practice, Brillion has a tool for you. Rely on Brillion to solve all your toughest challenges.
