

**OFFICE OF THE GOVERNOR**

CHESTER J. CULVER  
GOVERNOR

PATTY JUDGE  
LT. GOVERNOR

August 26, 2008

Dear Farm Progress Show Attendees:

Welcome to Iowa, home of the 2008 Farm Progress Show. We are pleased to extend a warm welcome to you on behalf of Iowans in Boone and throughout our state.

We want to thank Vision Iowa and the Central Iowa Expo.

During the past 55 years, the Farm Progress Show has earned an enduring reputation as America's premier farm show. From field demonstrations to commercial seed plots and livestock, entertainment, and more, the Farm Progress Show is a wonderful opportunity for the whole family to have fun while learning more about the latest developments in agriculture. Once again this year, we would like to thank the Farm Progress Companies Inc. for coming back to Iowa and to *Wallace's Farmer* for contributing to this event.

We hope you enjoy your visit to the Farm Progress Show. To our guests from other states, we encourage you to visit Iowa's scenic roads and byways to discover some of the best culture, attractions, and hospitality that our nation has to offer.

We wish you all the best for a fulfilling and memorable visit.

Sincerely,

*Chester Culver*  
Chester J. Culver  
Governor

*Patty Judge*  
Patty Judge  
Lt. Governor

## Show Program Table of Contents

Exhibitor List.....	40
Stock dogs .....	60
Hospitality Tent .....	63
Inventors Challenge .....	64
<i>Rural Life</i> Tent.....	68
Central Iowa attractions .....	70
Product Category List .....	74

## Take command over residue and compaction problems. Introducing the new Landcommander III.

With greater reliability, easier adjustment and a proven design, tillage just became a whole lot better. The Landcommander® III features high-clearance auto-reset shanks to work through the heaviest residue without plugging. The new, heavy-duty coil-spring shank design provides holding power in the toughest soils.

Adjustable disc gang angles and hydraulically controlled operating depth allow you to control the amount of residue you want to bury while leaving the fields level. The Landcommander III is available with 15", 20" and 30" shank spacing and working widths from 15' to 20'.

**This third generation Landcommander is built with today's high yields in mind. Expect greater reliability. Expect improved performance. Receive nothing less from Brillion.**

Visit us at Lot # 414-416, 513-515 at this year's National Farm Progress Show.
