**"Our goal is to earn our customers' trust, and we do - every single day."**

Dave Hoy  
Great Lakes Agronomist

### How much do people matter?

High-performing seed is not a commodity. Neither are high-performing people. Great Lakes people earn trust by delivering on promises - with sales and agronomic support that build long-standing relationships.

### Attention to your bottom line.

Our independence sets us apart. When we recommend a hybrid, you can trust it was developed with one goal in mind. And at the end of every season when you do the math, that trust is repaid.
