

“You don’t hear about DEKALB® corn falling down. My DEKALB stands like a flagpole – people notice it.”

Shane Meier went from planting a pallet or two of DEKALB® to planting 100% of his corn acres to DEKALB over just a few years – a decision he’s confident in because “it just yields better than everything else I’ve tried.”

“DEKALB gives me the total package,” Meier says. “They’re the technology leader. If I keep planting DEKALB, I believe my yields will continue to increase.” He plants DEKALB YieldGard VT Triple® because “the more technology in the bag, the higher my yields.”

Shane Meier
Grammer, Indiana

Farmers like Shane Meier are confident in their decision to plant DEKALB for its superior performance, advanced breeding and trait technology, and proven yield advantage.

Three reasons why more farmers are planting more DEKALB.

Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.

Always follow grain marketing and insect resistance management requirements, and read and follow pesticide label directions. Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® agricultural herbicides. Roundup® agricultural herbicides will kill crops that are not glyphosate tolerant. YieldGard® products are not yet registered in all states. Check with your Monsanto representative for the registration status in your state.
