

*Planting seed that gets the most out of every acre.*

*Now that's Farming Smart.*

These days, there's a lot of talk out there about stacked traits and improved genetic profiles. But the truth is, there is one brand of seed corn developed specifically for the needs of Midwest growers— FS Seed Corn. With its high-yielding genetic foundations and proven performance record, FS Seed Corn is offering Midwest corn growers greater profit opportunities than ever before. So when you choose FS Seed Corn, you can be sure you're getting more than just top-of-line genetics, you're getting bottom line results. Now how smart is that?

*Farming smart begins with FS seed.*

*Always follow IRM guidelines and grain channeling requirements.*
